

If you're **blind or visually impaired** and would like to see the possibilities, let's get started!

Becoming empowered to change your future requires self awareness of skills and abilities, knowing what your options are, and a willingness to work toward a realistic goal. Having the tools you need, knowing how to use them and being prepared to take the necessary steps will allow you to fulfill your potential.

When it's all about independence:

Learn to take care of yourself and function effectively at home, in school at work or at play.

How does it work?

Everyone's circumstances are different. Individuals meet with a counselor to identify goals and together develop and implement a plan.

Services vary according to need:

Whether it's to get an education, train for employment, get or keep a job or maintain independence in your home, your efforts combined with available services will help you succeed in reducing the limitations that result from a loss of vision.

We offer:

- Counseling and Guidance
- Assessment of skills, interests and abilities
- Transition services for students
- Technology
- Low vision services
- Orientation and mobility services
- Rehabilitation training

When it's all about jobs, jobs, jobs:

DBVI offers vocational counseling, coordination of services, and assistance with access to programs to help you secure and maintain employment.

DBVI provides:

Career Exploration
Vocational training
Post secondary education
Adaptive equipment and technology
Job seeking skills
Employer assistance
Small business development
Job placement services
